

Access the best of DeFi from one platform with one token

Problem

- **DeFi is difficult**

The learning curve to participate in various DeFi protocols is steep and the risk of loss comes with little education for users.

- **Referrals aren't rewarded**

There is no financial incentive for existing educated DeFi users to onboard new users.

- **Liquidity is not loyal**

Yield farmers leave after liquidity mining incentives are gone

Solution

- ✔ **Simplify the experience**

Make the experience of growing assets easy, enjoyable and rewarding by removing friction during the process.

- ✔ **Permissionless partners**

Incentivize a decentralized, autonomous customer service and marketing workforce with a permissionless referral reward program.

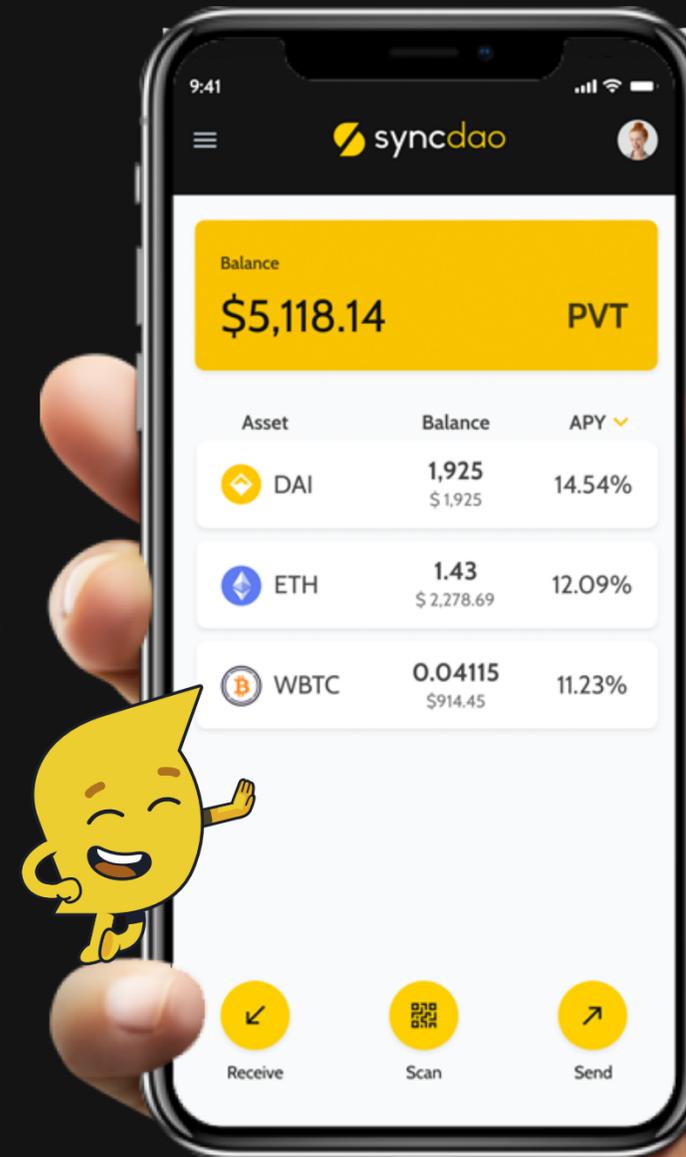

- ✔ **Educate the community**

Educate users on DeFi and the benefits of compounded portfolio growth experienced over the long term.

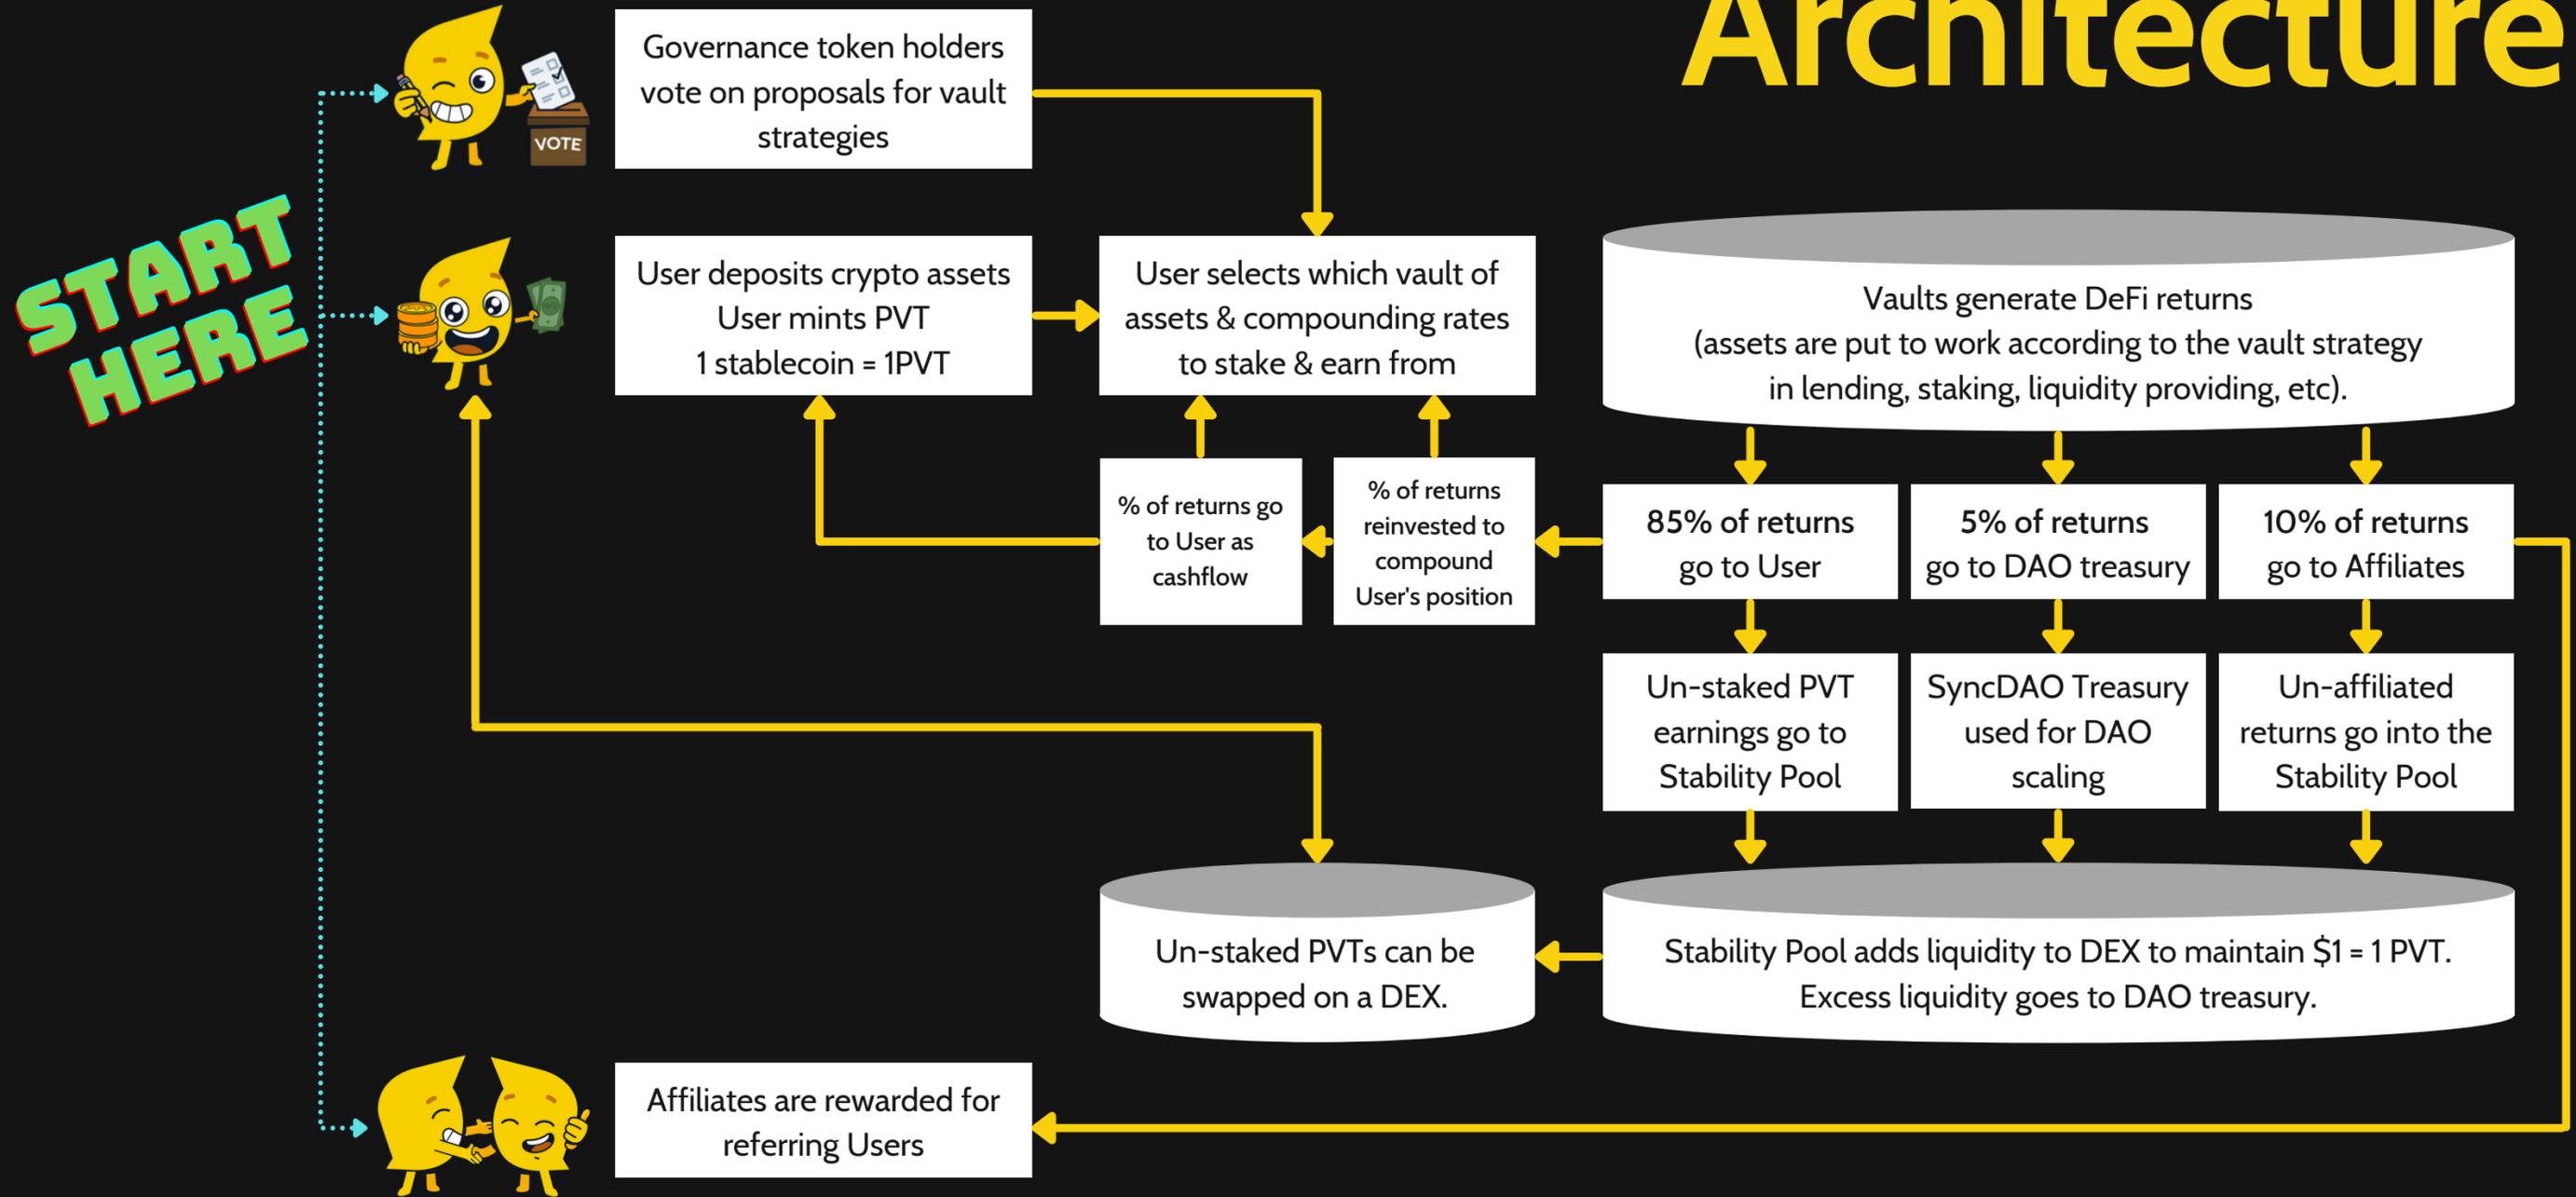

How it works

- Users mint PVTs to deposit into our Vaults. To exit our ecosystem they swap the PVTs for stablecoins at a DEX.
- Vaults aggregate yield from different strategies and protocols allowing users to experience the DeFi market without leaving our ecosystem.
- The affiliate rewards create an autonomous sales force constantly engaged in onboarding new users.
- Governance Token holders decide which vault strategies and protocols they want the DAO to utilise, giving sovereignty over their wealth.

Referral Rewards

- DeFi needs advocates to make sense of the complexities for the broader crypto market.
- We anticipate referrers to be initially influencers and longer term DeFi users. Over time we anticipate this will be professionals in the traditional wealth management sector, wealth coaches, internet marketers, traders and investors.
- The referral rewards give the DAO a scalable autonomous workforce with permissionless onboarding which creates inclusiveness for individuals in all walks of life.

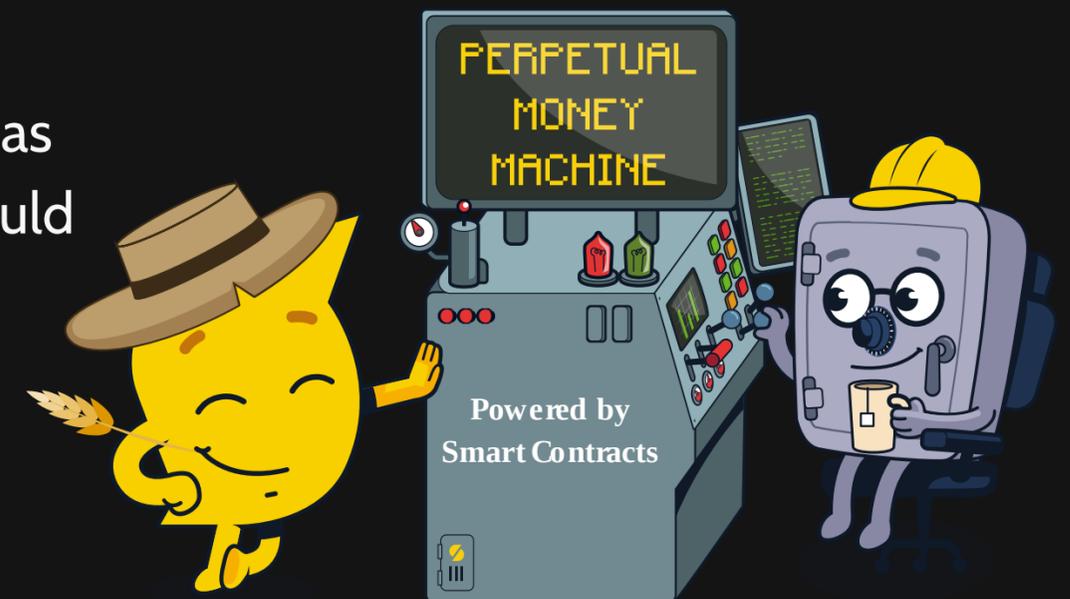

Why Now?

Interest rates are dying

People are chasing yield via various investments as the traditional banking system is not offering sufficient return on capital.

DeFi is still at early adopter

The DeFi ecosystem has been established and the overall crypto market has rapidly accelerated in growth, creating a market of active investors who could be new potential DeFi users.

Who do we serve?

DeFi newbies

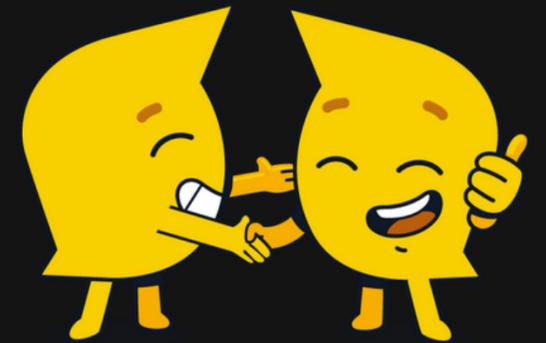

Those who are existing investors in the cryptocurrency space yet to participate in earning yield on their assets. They typically have bought their assets on a centralised exchange and are HODLers. We are likely to be their first DeFi experience.

DeFi natives

Along with being rewarded with yield, these have the opportunity to earn an additional income stream by referring their network to our platform.

Developers

The Perpetual Vault token enables developers, growth hackers and creators to use the PVT as a money making primitive for their creative endeavours.

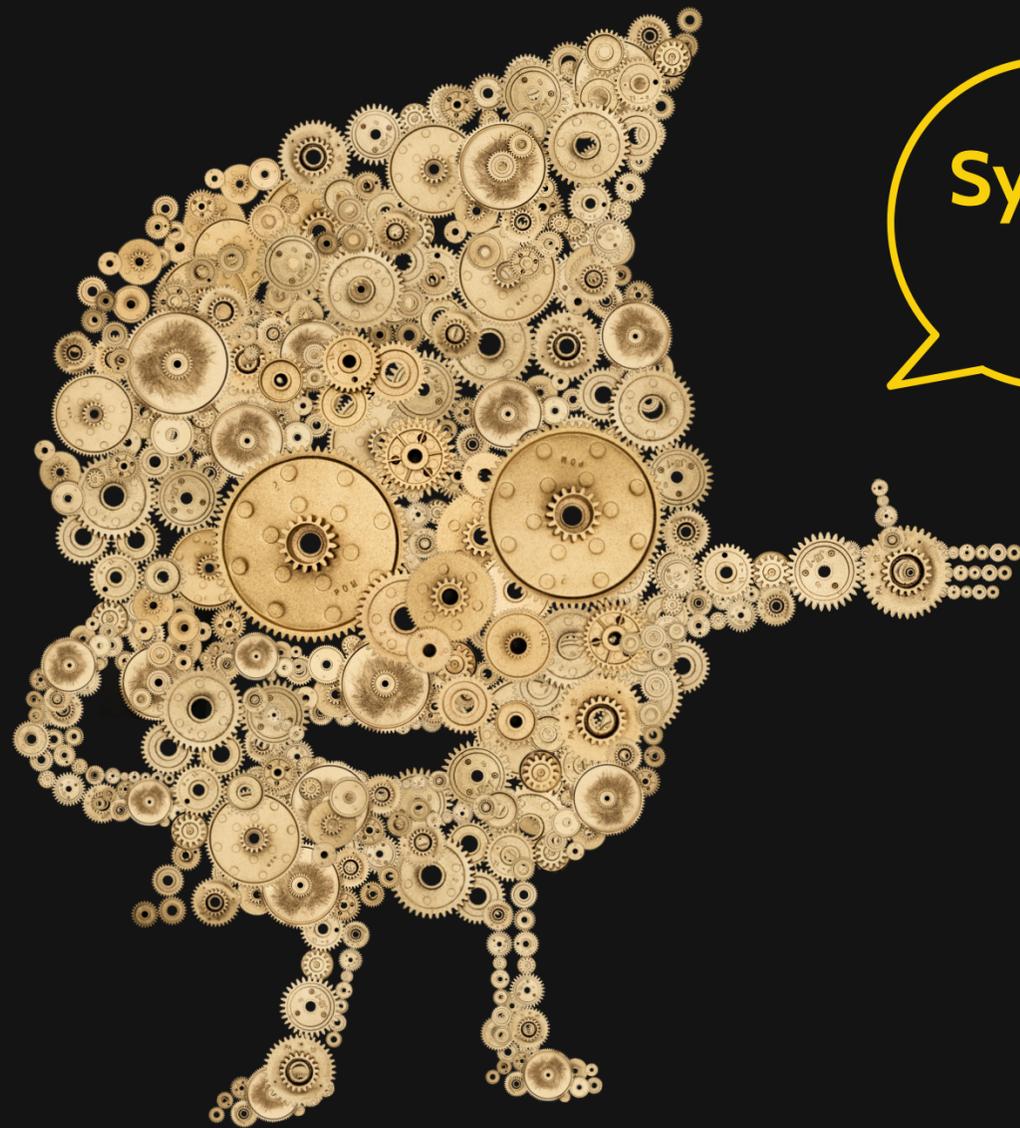

Strategic partners

These are companies that have the opportunity to create an additional revenue stream by referring their customers to our platform.

Business Model

SyncDAO is a Decentralized Autonomous Organization.
This is the business model of the future.

The Perpetual Vault's total value locked only ever goes up because users mint and swap PVT tokens, not underlying capital.

The DAO treasury grows with a percentage of yields, NFT royalties, and future strategies as voted by the community.

Competitive Advantages

✔ Ease of Use

We want to be the easiest DeFi platform to use.

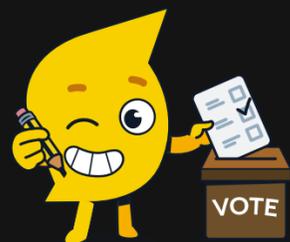

✔ Choose your own yield

Earn yield in stable or volatile assets and choose the vault strategy that works best for you.

✔ Referral rewards

We have a decentralised sales force, allowing them a way to autonomously extend their income opportunity with referral rewards.

✔ DAO it together

SyncDAO Governance Token holders can participate in how the organisation is run.

Sync is focused on innovation, always believing that any challenge is temporary and has a solution.
- ✔ **Everyman**
Sync is highly relatable and enjoyable, making people from all walks of life feel a sense of belonging in DeFi.

Early promotional opportunities

✔ Recruit "Regens"

We are actively building our pre-DAO launch community of regenerative community aka 'Regens', to come on board now and help us share this sensible and secure financial freedom technology with the mainstream market.

✔ "First In Line" Reward APYs

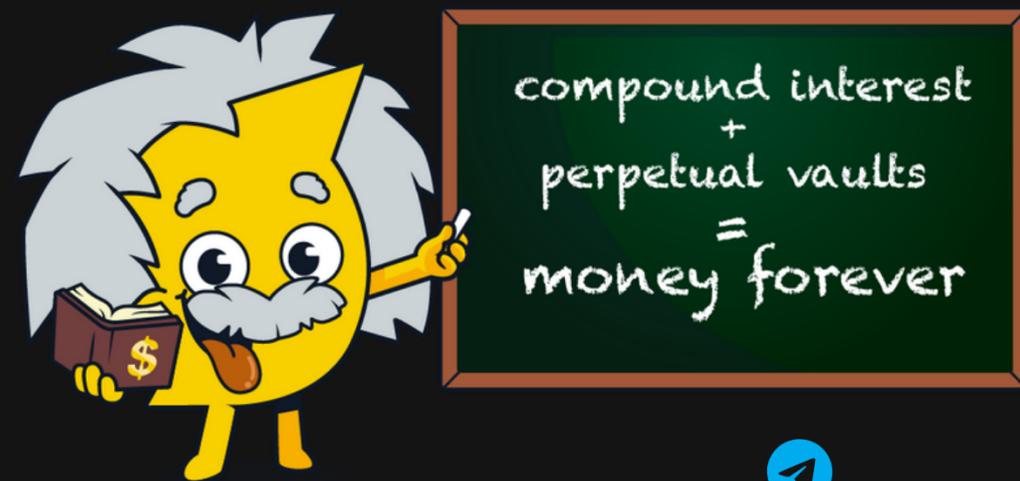

We are offering generous usage rewards in the first 3 months of our Vault release. The earlier and larger the deposit the larger the share of the rewards.

✔ Syncpreneurs

Passive income is the new black and our referral rewards offer the chance for those who are entrepreneurial to create for themselves another income stream by onboarding new users to our Vaults. Affiliates will be offered training and networking opportunities. Come join us.
