Implementing the SyncDAO brand in communications - updated 1 November 2021

These guidelines will tell you the story of the SyncDAO brand.

If you have any questions along the way, please email the team at [hello@syncdao.com](mailto:hello@syncdao.com)

## THE STORY

---

SyncDAO is a Decentralised Autonomous Organisation (DAO) founded by Rossco Paddison and Paul Holland, which aims to bring decentralized finance (DeFi) to the mass market by incentivising referrals to its easy to use platform, offering the best of DeFi yield generating protocols via its Perpetual Vaults.

There's a wave of retail users coming to DeFi who are attracted to stable returns because traditional banking is failing them. However, helping a new user into DeFi and showing them how to leverage the technology is labor intensive and undervalued at large.

SyncDAO bridges this gap with audited smart contracts that transparently rewards referrers to turn new users into lifelong DeFi advocates — giving them the power to be their own bank — and SyncDAO makes it simple to do so!

The decentralized foundation of SyncDAO means that the community has the decision making power to determine what their finance looks like through Perpetual Vault strategies. The SyncDAO ethos is built on trust, accessibility for all, and guiding people into a brighter future, so the brand is designed to communicate these values.

# The SyncDAO logo represents connection.

In the icon, the two halves can be representative of the following dualities coming together:

- Halves of a coin; one piece can be considered the traditional finance side of fiat money connecting with the modern piece of DeFi and cryptocurrency.
- Slices of a DeFi portfolio; one representing stablecoins, the other representing volatile assets. Together they form a balanced portfolio for growth.
- Sparks of inspiration; one rooted in finance, the other in technology. Together they make financial access and equity possible through DeFi.
- Users and affiliates connecting to form the basis of SyncDAO.
